Manual

Wireless monochrome magic 86 panel switch water controller

Product features

Welcome to use this magic color monochrome water product! It supports a voltage range of 5-24V and has 2048ic points for you wonderful visual effects. This product has a total of 28 unique modes to meet your diverse needs.

Remote instructions

Arrow up on the code key icon (↑)

Mode of operation: Press and hold within 10 seconds of power-on. When the indicator blinks three times, It indicates that the code is successfully paired.

For example:when you connect a new control device for the first time, use this key for code alignment.

The arrow of the erase key icon goes up (↓)

Mode of operation: Press and hold within 10 seconds of power-on. When the indicator blinks three times, That is to complete the decoding code.

For example: if you need to replace the paired device, you can first unpair the code and then re-pair the code.

IC set: Long press "IC set" (10 seconds within 30 seconds of power-on) : Reset button. When the flow starts, the reset is successful.

If the product is abnormal or you want to restore the initial settings, you can use the reset function.

Short press "IC set" (power on) : Used to adjust the number of IC points. Icon arrow up key to increase points, Icon arrow down key to reduce the number of points, adjust the number of points after the key to confirm the number of points.

For example:when the light strip exceeds the default 80 points or is shorter than 80 points, the number of points can be adjusted to optimize the length of the light strip.

Pattern presentation

The product's 28 modes cover a wealth of visual effects, including but not limited to the following types:

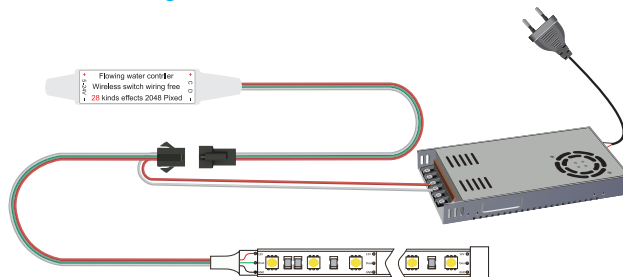

Dynamic gradient mode, soft color transition, create a warm atmosphere.

Fast flicker mode for increased liveliness.

Orderly flow mode, bring smooth visual flow.

- 1、Operating voltage: DC5-24V(as long as the positive and negative poles on the side of the light bar are connected to the power supply, the controller can be directly plugged into the light bar)
 - 2、Operating temperature: -20-60°C
 - 3、Control points: Up to 2048 pixels (2048 ics)
 - 4、Effect mode: 28 effects, with light on water forward, light off reflux special effects.
 - 5、Remote control size: L86*W86*H10mm
 - 6、Controller size: L45*W13*H5mm
 - 7、Battery model: "CR2025"
- (Battery can be purchased by searching CR2025 on major e-commerce websites)
